WHO AM I?

Expert Cloud / DevOps / Database Engineer with 15+ years in financial and telecom industries. With extensive expertise in Oracle, Python, and cloud automation (Azure, Ansible, GitLab CI/CD), I am skilled at designing secure, scalable, and high-performance platforms. Adept at solving complex challenges and driving innovation in fast-paced environments.

EXPERIENCE

- 09.2024 – now **Cloud / DevOps Engineer** **UBS, Wrocław, Poland**
- Managed Azure infrastructure, focusing on Azure Kubernetes Service (AKS) and PostgreSQL, with emphasis on geo-redundancy, disaster recovery, performance, and cost optimization.
 - Collaborated with development teams to enhance deployment workflows using GitLab CI/CD pipelines and Helm charts.
 - Automated infrastructure provisioning and configuration through Ansible playbooks.
 - Designed and implemented a Python CLI tool for efficient Azure subscription management and secure database connectivity.
- AKS / Azure / Python / Ansible / GitLab CI/CD
- 06.2023 – 09.2024 **Oracle Database Engineer** **UBS, Wrocław, Poland**
- Engineered Oracle database solutions on Azure VMs with Entra ID integration, implementing a security framework using Python, Azure Functions, and Service Bus, automated via GitLab CI/CD.
 - Developed and supported DBaaS platforms, enhancing automation, monitoring, and regulatory compliance.
 - Partnered with cross-functional teams to deliver secure and high-performance database services.
- Azure / Entra ID / Python / bash / GitLab CI/CD
- 07.2022 – 06.2023 **Oracle Security Expert** **UBS, Wrocław, Poland**
- Engineered and deployed Oracle database security solutions, including LDAP, certificate-based authentication, and Kerberos integration.
 - Automated compliance and audit workflows, remediation, and reporting using Python and Bash scripting.
 - Facilitated large-scale migrations, such as SHA2 upgrades and LDAP OID to OUD transitions.
- Oracle / LDAP / Cryptography/TLS / Python / bash
- 01.2019 – 07.2022 **Oracle Database Engineer** **Swisscom, Zurich, Switzerland**
- Optimized performance and resolved issues on Oracle Exadata and ODA platforms.
 - Automated deployment processes using Ansible, increasing speed and reliability.
 - Managed cross-platform migrations and data replication with GoldenGate (Oracle-to-Oracle, Oracle-to-Teradata).
 - Enhanced monitoring systems (OEM and custom tools), reducing manual effort and improving operational efficiency.
- Exadata / Oracle / Golden Gate / Ansible / Python

- 07.2014 – 09.2018 **Oracle Onsite Coordinator** **IBM for SwissRe, Adliswil, Switzerland**
 – Managed a 10-member DBA team, overseeing key database engineering projects such as Exadata migrations, backup modernization, and redundancy testing.
 – Championed automation efforts, mentored junior staff, and partnered with Oracle ACS to resolve complex performance issues.
 Exadata / Oracle / bash / PL/SQL
- 04.2012 – 07.2014 **Oracle Database Administrator** **IBM for SwissRe, Wrocław, Poland**
 – Administered 100+ Oracle databases, specializing in installation, configuration, backup/recovery, performance tuning, and troubleshooting across Linux, UNIX, and Exadata environments.
 Linux / Oracle / bash / SQL
- 06.2011 – 04.2012 **Computer Operator** **IBM for SwissRe, Wrocław, Poland**
 – Monitored and maintained over 2,000 Windows and UNIX servers, providing first-line support and coordinating major infrastructure changes.
 Windows / Linux / Hardware

CERTIFICATES

- 2023 **See all my certifications** **credly.com/marcin-hajost**
 All current certificates and badges are listed online.

EDUCATION

- 2002 – 2007 **Master of Science in theoretical Physics** **University of Zielona Góra**
 Faculty: Physics, Major: Computer Science
- 1999 – 2002 **High School Graduate** **Maria Skłodowska - Curie High School in Andrychów**
 Faculty: Physics and Math

LANGUAGES

English - fluent
German - rudimentary
Polish - native
